Good morning,

I have the following comments and considerations on the draft guide I would like considered:

- Common hazards that cause injuries in the food delivery industry (page 3)
  - o Equipment unsuitable for the task: Please add not wearing helmets and other PPE such as hi visibility clothing
  - o Other vehicles such as buses, trucks, cars and other bikes: Please consider adding additional other crash to include undertaking (cyclists trying to pass a vehicle on the left or inside). And please consider adding additional point to capture “limitations of large vehicles such as blind spots”.
- Action to be taken by Duty Holders to control common hazards (page 9)
  - o Other vehicles such as buses, trucks, cars and other bikes: Please consider adding additional dot point after the first dot point to capture ‘additional information on the risks of riding around heavy vehicles, including risks of blind spots’.

Please let me know if you would like to discuss further or if you have any questions. Thank you.

Regards,

Luke
